**Spot 1001: “Seamless Eavestrough”**

(Vx1: Narrator.)

**Vx1:** When it comes to eavestroughs, sometimes *complicated* is *simple*. Traditional rain gutters are made of sections with too many seams that can leak over time. At Ostrander Construction, we handcraft seamless eavestroughs from one continuous length to ensure a watertight seal. What we do is *complicated*—what you *get* is *simple*: no leaks, and no problems. You know where you stand with Ostrander Construction.
